

T1A3 WEBSITE PORTFOLIO

Ling Y Lee
3 April 2020

Overview of Process

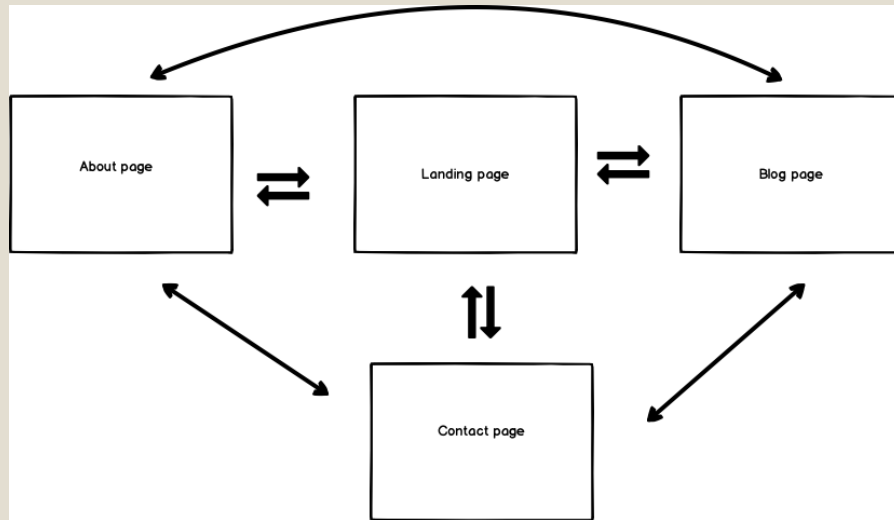

Research

- looking at other website for ideas
- about Parallax – 3D effect where content moves at different speed
- Tutorials on using SASS/SCSS

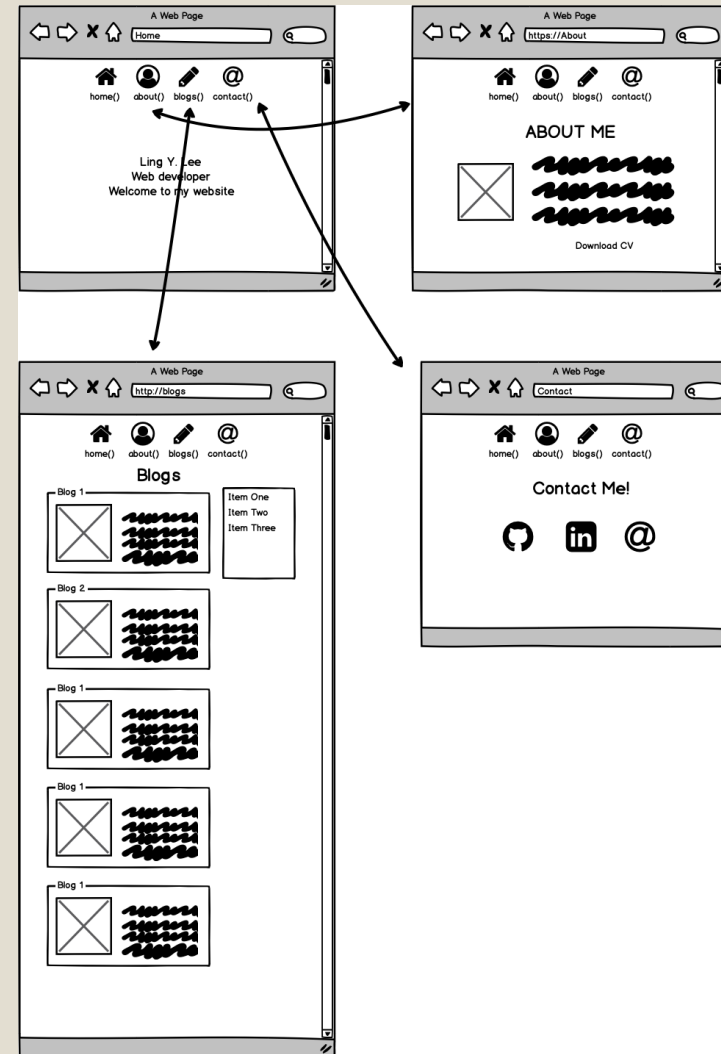

Using balsamic to structure the layout

- Using balsamic for wireframes , sitemaps

Site map

Wireframe

Site Demo

- Features
 - Parallax effect
 - Download CV,
 - Links to LinkedIn, Github, open default email program
 - Responsiveness
 - use SASS/SCSS to create 3 viewport sizes (phone, tablet, desktop)
 - Subresource Integrity
- Components
 - A NavBar with color animation
 - Bouncing arrow
 - Blogs moves on hovering
 - List items highlighted on hovering

Challenges/What I learnt

- Designing the website.
- Finding out the easiest way to install and use Sass/SCSS.
- Parallax especially challenging for responsiveness (when viewport changes).
- Having wireframes really help.
- SASS is really cool and powerful.
- Learning how parallax works.
